The following is a legend for the attached sketch:

25X1

1. Pier where two ships of approximately 10,000 tons each can moor alongside. On this pier there are two supply points, each of which is fed by two pipes. Each pipe can supply about 200 cubic meters of liquid fuels per hour.
2. Pier where a large ship of approximately 20,000 tons can moor alongside. On this pier there are two supply points, each of which is fed by two pipes. Each pipe can supply about 200 cubic meters of liquid fuels per hour.
3. Pier where two ships of approximately 10,000 tons each can moor alongside. On this pier there are two supply points, each of which is fed by two pipes. Each pipe can supply about 200 cubic meters of liquid fuels per hour.
4. Two supply points, A and B, are located on this pier similar to the ones mentioned above. Two ships, of approximately 10,000 tons each, can moor alongside at this pier, while there is some space left open in the center where a freighter can moor alongside and be loaded with freight of a solid nature. No work was being carried out for the construction of a third supply point.

[] tankers being loaded at piers 1, 2, 3, and 4.

25X1

5. Pier where only one ship can moor alongisde. On this pier there is only one supply point which is fed by five pipes. Each pipe can supply between 140 to 150 cubic meters of fuel per hour. Gasoline, kerosene, and pure alcohol are loaded at this pier. All installations on the pier are new.
6. A permanent dock is located at this point which was constructed in 1940. [] ships of 10,000 to 12,000 tons capacity in dock at this point.
